SusCon course - leading the way in sustainable construction training

This course is primarily aimed at those in facilities management, energy management and property roles. It aims to provide a foundation level understanding for those responding to legislative and policy measures such as the Carbon Reduction Commitment Energy Efficiency Scheme and the NHS carbon reduction strategy.

A relevant practical professional or management qualification or experience is preferred, but not essential.

Course content

This is a theory-based course that will cover:

- Practical examples of monitoring, evaluating, re-representing and consolidating data
- The collating of results and formulating the presentation of data
- The review of three examples of energy and carbon audits
- Typical audit calculations
- The completion of an outline of an energy and carbon audit process for a real world situation

Course duration - six hours (in one day), 9:45am – 4.45pm (lunch included). Free to employees from SMEs with offices in the South East (conditions apply, normal cost £280). Certification: Participants will be sent a certificate of attendance following completion of this course.
